## Notes:

- Turn on computer and monitor with power buttons on those components.
- Use touch panel to turn on/off projectors and lower screens (do not use remotes).
- Use touch screen to switch to laptop HDMI or VGA (**not** doc camera, see below).
- Use small remote to turn on Smart Board. Be patient after pressing "on". Please...
- Smart software for board only works with desktop computer, not laptops.
- Input on Smart Board is **hdmi1** (should be automatic).
- Audio adjusts on computer and on touch panel under "audio."
- Document camera runs through desktop computer - HoverCam Flex10 application.
- Do not mess with wires or components. Ask for help. For real, though.
- **Only use dry erase markers on dry erase boards, not Smart board.**
- Classroom supplies or cabinet key: Ashley McCullough, room 2-225a
