Warnell School of Forestry
& Natural Resources

Spring 2021 Graduation

Congratulations, Warnell graduates! This is a big day for you and your families to celebrate your newly earned degrees from the Warnell School and becoming an official Georgia Bulldog.

I'm especially proud of every student receiving a degree this spring. The past year has been one for the record books, and throughout it all, you persevered like the bulldogs that you are. Today, we honor your achievements and celebrate your future successes.

One of the aspects of Warnell that we're most proud of is our shared connections. This begins in our classes, where group projects and getting our hands dirty create bonds among classmates. But these experiences go beyond one class, connecting our students across generations. Whether it's a summer field experience, taking measurements out at Whitehall, sitting on the porch at Flinchum's or pulling an all-nighter to finish a senior project, we are connected by our uniquely Warnell experiences.

Now, as our newest alumni, you join the ranks of Warnell students who fondly look back on these times and say, "Remember when...?" And wow, what "remember when" stories you will be able to tell.

Welcome to the Warnell family! You now join the ranks of some of the most accomplished and respected forestry and natural resource professionals in the country. And, wherever your career takes you, please don't be a stranger. We look forward to seeing you back on campus—yes, in-person!—in the near future. Please keep in touch—We love hearing where our graduates land, and your experiences in the future may one day help another Warnell student make their own valuable connections in the natural resources.

You have weathered a storm unlike any other, and you should be proud of what you've accomplished.

Go Dawgs!

A handwritten signature in cursive script, appearing to read "Julie", with a long horizontal flourish extending to the right.
